Overview

Crystal transfer machine is used to make crystal crafts. Printing images first on the crystal film, bonding to the crystal material with glue for the second step and clip the unused film and then put it in the crystal machine to fix the image on the crystal with the UV lighting. Last but not least, to coat another kind of glue to protect the image and then trimming and cleaning are both necessary.

Characters:

- . Good printing effect; after printing images on the crystal film, it looks more beautiful and attractive
- . Widely used; not only it is used to print images on crystal materials, but also on normal glasses
- . Reasonable cost; with not too much cost, it can greatly increase the value and price of the crystals
- . Finished crystals is applying in many ways, such as commemoration, gifts, adornments, etc

Remarks: This type of crystal machine is steady and has higher speed.

Guarantee & Aftersales Service

Comprehensive guarantee for one year except the wearing parts.
24-hour technical support by email or calling.
