Overview

- . Delicate outer appearance
- . Reasonable and improved mechanical structure
- . High speed, optional table length
- . Smooth and perfect output
- . Power saving and time saving

Description:

This banner welder is delicate with reasonable mechanical structure. For the operating table, the improved rail materials enable the whole structure more stable. The air compressor, voltage stabilizer and controller are all fixed into `one` solid unit so that the operation becomes much more safe and convenient. The working table could be larger and 3m is one unit, but the standard working table is 6m and could be enlarged to 9m, 12m, 15m, etc. Applications: This flex banner welder is used for advertising materials welding, such as, flex banner, housetop tarpaulin, swimming pool for PVC membrane, banner, etc

Specifications

Specifications:

Table Length: Free Choice (118.1"(3000mm)/ piece, Standard: 236.2"(6000mm))

Rated Voltage: Single Phase 50Hz, 220V±10%

Welding Width: 0.4"*1.6" (10mm-40mm)

Welding Speed: (39.4"-236.2") 1-6m/min

Rated Power: 5KW

Floor Requirement: 7.8?

Frequency: 27.12MHz ±0.5%

Working Pressure: (4.4lb-8.8lb) 2-4Kg

Cooling: Air cooling

Air Requirement: 6 bar

Pack Size: Main Machine 65.4"x38.6"x39.8" (1660x980x1010mm)

Welding Table:125.2"x37.8"x31.5" (3180x960x800mm)

Weight: 1565.3lb (710kg)

Certification: CE
