### Overview

**Characteristic:**

- Using Resin-Coated paper for its substrate, preventing blurring from `ink` or moisture.
- Soft, satin, micro-grained print surface brings gentle tone reproduction to the photo quality print.
- Highly ink receptive, achieve high color density and superior color stability.
- Provide superior imaging qualities with outstanding dot control, a wide color gamut and excellent image sharpness.
- Dry instantly with most inkjet inks.
- Smudge and water resistant.

**Highlight:**

This Premium Satin Photo Paper is a photographic quality microporous RC paper, working on both thermal and piezo inkjet printers, both pigment ink and water-based dye ink are suitable.

**Suitable printer:**

Widely use for water-based dye or pigment Aqueous Thermal and Aqueous Piezo inkjet printers such as Epson,Roland,Mutoh,Mimaki,Hp,Canon,Novajet,etc.
