Overview

94" (2400mm) Bending Acrylic Machine

Bending the materials like acrylic, plastic, PC, PVC and PP. Hot bending process equipment, the acrylic bender can be adjust any angle and shape within 30-180 degree.

- Automatic and manual function with CNC operations
- Automatic function to bend the sheet
- Softening crevice can be adjusted according to the thickness of plate
- The heating plate can be fixed avoiding defamation
- The Acrylic Bending Machine has an infrared heating system to prolong the lifespan for more time rather than the hot furnace filament.
- The temperature and working voltage can be adjusted according to the material and thickness.
- Water circulation protects the configuration and the overheating alarm temperature ensures the safety of the machine.
- The current package protects the equipment.
- Bending acrylic support for PVC, PE, PS, ABS, PP and more.
- Thickness range ending: 0.8mm to 6mm (there is no need to cut a slot on the sheet)
6.00mm to 20mm (there is need to cut a slot on the sheet)

Details

Working Area	94" / 2400mm (W) x Unlimited (L)
Maximum Process Thickness	0.8" (20mm)
Main Applications	Bending the materials like acrylic, plastic, PC, PVC and PP. Hot bending process equipment. It can be

adjust any angle and shape within 30-180 degree.

Specifications

Specifications	
Model	ABM-SB-2400A
Angle	30°-180°
Bending Thickness	0.8mm ~ 20mm
Working Length	94" (2400mm)
Power	7.5KW (Working power 2.5KW)

QA

Q

What do you mean by gas connection as mentioed in the users manual?

A

Since the bending machine is pneumatic, it takes advantage of gas for bending.

Reply by [sign-in-china](#)

Q

Your machine operates between 30-180 degrees,what shall we do if we have bending angles between 0-30 degrees ?

A

You can also bend angles between 0-30 degrees, but need one extra acetabula, extra cost is 180USD.

Reply by [sign-in-china](#)

Q

What do you mean by supports for bending arcs?

A

The machine supports for bending arcs, but need some mould.

Reply by [sign-in-china](#)

Q

Do you give technical support in time as soon as there is problem with the machine after we get?

A

Yes, sure.

Reply by [sign-in-china](#)

Q

Can the machine only bend sharp angel?

Both sharp angel and arcs with extra mould.

Reply by [sign-in-china](#)

A

Q About the heating tube, is it easy to change? and how much it cost for each tube?

A

the heating tube is easy to change,and a heating tube working life normally is 1 year ,it depends on the daily working time.each tube cost \$25

Reply by [sign-in-china](#)

Q

Is there 2 heating tube on the surface and the bending knife or only one heating tube.

A

we can supply both 2 kinds of machine,it is up to you .

Reply by [sign-in-china](#)

Q

what is the thickness of the acrylic bending machine can bend?

A

:The maximum thickness is 20mm.and 1mm-10mm no need to cut a slot, 10mm-20mm must to cut a slot when bending ,because it is too thick to bend ,if not, there will be a bulb to bending the thick acrylic .
