Overview

Description:

The main processing ways for double-color plastic sheet cover cutting, sawing, carving, gilding, laser-treating, bending and bonding.

Features:

- . Easy cutting, sawing, stamping, engraving, laser engraving, bending and paste.
- . Thickness is equal to or greater than 0.1" (1.5mm), sculpture depth is no more than 0.3mm.
- . Surface thickness is 0.3mm, bottom thickness is 1.2mm.
- . The surface is frosted.

Inspection standard:

- . Surface scratches, spots are defective.
- . Tearing part of the protective film to see whether it fades, if it does, can not be used.
- . Comparing the color difference with a batches of same color plate number, the better the smaller color difference. When the color difference is too large, the sheet can not be used.
- . We can produce sheets of more than 200 colors.

Applications:

ABS double-color plastic sheet is a kind of materials for engraving, which is widely applied to production of signboard, lighting advertising board, gift arts, information board, interior decoration, commercial space sign systems, and so on.
