Overview

Features:

Top 10 new Products and Technology selected by professional and authorities.

I. Simple printing process

Processes such as plate making, plate burning and repeating the color registry are not required.

The traditional printing methods, e.g. silkscreen, are unable to realize transition of all colors according to the pictures. Therefore, there will be trenchant lines between colors made by the silkscreen process. It is difficult to demonstrate the color transition between two colors. CALCA digital flatbed printers, are able to meet such requirements, breaking through the bottlenecks of silkscreen printing, sublimation printing, etc., to help customers create a new profit growth.

II. It is compatible with different industries and unlimited materials, catering to the demands of the market and diversification, providing a comprehensive production.

CALCA digital flatbed printer is a three-dimensional digital flatbed printing system which adopts different ink programs, including the uncoated ink and coated preprocessed ink, which prints chromo-photographs in different materials. It is ideal for gifts, advertising, interior design and decoration, digital images, toys and individualized printing industries with tremendous market potential.

Suitable materials:

Organic glass, plastic, glass, leather, marble, special paper, t-shirt material, artificial fingernail, film, crystal, PVC, ABS, Acrylic, Metal, PP, PE, wood, bamboo, etc.

Application:

Mainly used to print colorful pictures, LOGO, characters or letters on the following items:

- . Digital products like E-U disk, and name card disk.
- . Silica gel products.
- . Crystal products and photo frames.

- . Gift packaging.
- . Card and certificates.
- . Package box.
- . CD or DVD.
- . Bags.
- . Leather products.
- . Three-dimensional jigsaw.

Details

Ink colors	C,M,Y,LC,LM,LK,LLK,PK,PBK/ 8color
Max Media thickness	200mm
Print resolution	2880x1440dpi
Printer head	Epson
Max print size	A2
Interface	USB2.0

Specifications

Model	CALCA A2-SIC4880A (short model)	
Machine model	CALCA A2-SIC4880A (Short Model)	
Max Printing size	Super A2 Format (Max):420mm*850mm	
Max printing Thickness	200mm	
Max. printing weight	Accurate resolution: 20kg	
Print Head Configuration	180 nozzles/colorx8 (intelligent transformation of the Droplet Technology)	
Bulk of Ink Dripping	Minimum dot 3.5PL	
Max printing Resolution	2880DPI*1440DPI	
Printing Speed	A2 (720dpix360dpi/plain paper/quality mode)	2.7min
	A2 (720dpix360dpi/coated paper/speed mode)	7.2min
	A2 (720dpix720dpi/coated paper/quality mode)	5.5min
	A2 (1440dpix720dpi/photo mode)	7.9min
	A2 (2880dpix1440dpi/excellent photo mode)	14.9min
Printing Colors	C,M,Y,LC,LM,LK,LLK,PK,PBK/ 8color	

Ink Tank Volume	220MLx8color
Net weight/ Gross weight	80KG/85KG
Printer Size	130CMx80CMx60CM
Printing Interface	USB2.0/1.1/100 Base-T
Power	110-220V 50-60HZ 75W
Working Environment	Temperature 10-35°C/ Humidity 20-80RH
Operation System	Windows95,98,NT,2000,XP,2003 MAC Linus
