Overview

Description:

UV inks are the fastest growing ink segment in the digital market. Some of the drivers for this phenomenal growth include their "green" aspect of no VOCs and low energy consumption for curing, as well as low scrap rate. UV inkjet ink is the upmost environmental friendly printing process in the market. With greatly quality concerned and superior R&D groups, our UV ink is formulated to meet high standard for our customers and benefited by good reputation.

Characteristics:

Print on uncoated substrates, such as soft roll or rigid flat media. 8 color, bottle, water-proof and UV resistance, 36 months outdoor durability.

- . Competitive price and save your cost.
- . UV Curable ink bonds to uncoated substrates.
- . No VOCs emission.
- . No hazardous air pollutants and heavy metals
- . Low scrap rates
- . 100% solid UV curing inkjet ink
- . White ink is more stable and not easily be precipitated
- . Ink being cured can be bended upto 180 degree without cracks
- . Fast curing.
- . No clogging of heads
- . Wide color gamut
- . Excellent light fastness.
- . Top quality ink source from `our` background as a professional pigment company, Taiwan
- . If it is required for special standard ink due to print head types or particular color presentation, please contact us.
- . minimum quantity > 132.1USgal (500L)

Application:

Can be used on Spectra printheads UV printers.

Application Project:

Print & Cut on gold-color label paper. Gloss ink creates a lattice pattern in the background

Printed with white ink on transparent film to present a sophisticated look.

Reproduce buttons and indent with multiple layers of gloss. These prototypes were produced for TV remote control units

Layered gloss simulated the button on the operation panel of this prototype

UV Curing Ink delivers professional print quality with vivid colors and realistic imaging

Print on the thick paper substrate

Back-printed on the transparent film with color and white inks

Won't crack when the media is PET it is suitable for wide range media

Print Braille using multiple layers of UV Curing Ink

Complete with spot varnish on the specified paper stock, create eye-catching 3D pattern

Layer gloss to produce area for mobile phone graphics

Create faux finishes including crocodile leather by layering gloss ink on polyvinyl film
