Overview

- **Roll Slitter with simple structure.**
- **Cutting materials precisely even to 0.2" (5mm) width.**
- **With a motorized core shaft and single-blade.**
- **Simple structure and convenient to operate.**

New developed CS-FQ750 roll slitter has a simple structure and is very easy to operate. With a motorized core shaft and single-blade, the slitter could be used to cut self-adhesive vinyl, double-sided adhesive tape, paper, application tape, film, fabric, foam, [flex banner](#) and awning. Roller slitter is different from `other` slitters because it can cut materials precisely that means it can cut more narrow rollers. This machine can cut materials with 0.2" (5mm)-wide roller and the cutting surface of material is smooth.

Highlights: Roll banner slitter is a kind of precise machine which can cut material accurately and widely used in cutting advertising materials.
