### Overview

#### Characteristics:

- . External frame material: Powder coated steel
- . Panel material: Tempered glass
- . Image: Single side scrolling
- . Usable life: Qualified installation will ensure normal service life up to 10 years, based on a 14 hour day use.
- . Automatic Poster Setting function: When the power is suddenly off, the poster does not show a full image.
- . The light box poster's moving time is about 4s, the stop/display time can be controlled from `0` to 999 seconds.

Scrolling Light Box integrates advanced mechanical, electronic and digital control technologies to achieve significant advantages in both functionality and reliability.

Scrolling Light Box is a multi-image advertising or information billboard, designed for both indoor and outdoor applications.

It can carry up to 15 posters on a scroll, controlled by a micro-computer, the display time of each poster can be precisely programmed from `1` to 99 seconds.

Up to ten Scrolling Light boxes can run in-sync to deliver breath-taking visual effect.

#### Highlights:

This kind of scrolling light box is single sided and can have a LED message display on the top, to increase value and enable high quality to meet customers' requirements.

#### Remarks:

1. The price includes light tube, but does not include the graphics. Images can be printed according to clients' requirements, but you have to pay an extra fee.
2. The unit price above is for MOQ=20 pcs, an additional 15% of the price will be added to orders that are less than MOQ.
